

Armourtech DPS 101

Deep penetrating Concrete sealer

Description

Armourtech 101 concrete sealer is a specially formulated high tech clear/flat water based penetrating sealer for all cementitious applications. Armourtech's unique formula penetrates and "fuses" to concrete, densifies the concrete, decreases the moisture permeability and appreciably helps stop water, oil, gas, grease, salts and other fluids from damaging concrete.

Armourtech also solves the problems of: *Water migration and Erosion - Staining - Mould, Mildew, Algae, Bacteria - Salt Erosion - Oils - Traffic - Animal Excrement - Freeze/Thaw - Concrete Dusting - Spalling - Efflorescence*

Features

Water based, environmentally safe, non toxic, no odour
Permanent
Retains natural non slip surface
Does not change appearance of the surface
Allows for easy clean up
Cure & seal- can be applied to damp and newly poured concrete
Increases surface abrasion resistance
Leaves surfaces able to receive paints and adhesives
Helps reduce concrete cracking
Assists in stain prevention
Can be trafficked on immediately

Uses

New construction
Existing concrete
Decorative/Coloured Concrete / Polished concrete/Concrete bench tops
Foundations/ pre-cast / tilt-up / bridge decks/ Bridges /Tunnels
